**POLISTAMP SYSTEM**

---

**Polistamp System** is born in 1978 as a thermal panel manufacturing company. Today this product constitutes its largest activity field but the company, given its know-how, is also present in other sectors. CASSIOLI's solution is composed of a **handling system** for ready-made, insulated metal panels, coming from a continuous production line. The line is complete with a piler and a packaging system, for subsequent transfer to the finished goods warehouse.
